- Do you know how to put out a grease fire safety?
 - DO NOT TOUCH THE PAN/POT
 - DO NOT USE WATER!
 - Slide a lid, cookie sheet, pizza pan, or pie tin over the top
 - Turn off the heat
 - Leave the pot on the stove top for at least 20 minutes

Smoke Alarms & CO Alarms

- Have you installed smoke alarms outside sleeping areas, inside each sleeping room, on every level of your home, and in rooms with doors that close?
- Do you check your smoke alarm (s) every month?
- Do you change your smoke alarm (s) batteries twice a year? (Change your clock, change your battery).
- Is your Smoke alarm (s) over 10 years old? Smoke alarms should be changed every 8-10 years.
- Do you vacuum and dust your smoke alarms?
- Have you installed CO alarms?
- Are your Carbon Monoxide Alarms installed in the proper place?
- How old is your CO Alarms. CO alarms should be changed every 5-6 years or according to manufactures instructions.

Fire Escape Plan (E.D.I.T.H.)

- Does your family have a fire escape plan prepared?
- Is your escape plan posted and regularly practiced?
- Does each bedroom have two ways out/exits?
- Does your family know how to signal for help if they are trapped in an upper floor of your home?
- Has someone in your family been assigned to assist younger children, seniors living in your home, and anyone who is disabled?
- Do all family members know how to dial 9-1-1 for fire, police or medical emergencies?
- Do your children know how to dial 9-1-1 from a cell phone, a cell phone that is locked, a phone with a key pad, or a rotary phone?
- Do you show your babysitter the escape routes from your home and review 9-1-1 with her or him?
- Does your family (and babysitter) know the first rule in fire emergencies: GET EVERYONE OUT FAST AND DON'T GO BACK INSIDE?
- Does your family have a meeting place?

Fire Extinguishers

- Do you have a fire extinguisher in your home, garage, car, and boat?
- Is your fire extinguisher current or expired? If the arrow of the dial is on the edge or no longer in the green area on the dial your fire extinguisher is expired.
- Do you know how to use a fire extinguisher using the P.A.S. S method
 - **Pull the Pin** at the top of the extinguisher. The pin releases a locking mechanism and will allow you to discharge the extinguisher.
 - **Aim at the base of the fire**, not the flames. This is important - in order to put out the fire, you must extinguish the fuel.
 - **Squeeze the lever slowly**. This will release the extinguishing agent in the extinguisher. If the handle is released, the discharge will stop.
 - **Sweep from side to side**. Using a sweeping motion, move the fire extinguisher back and forth until the fire is completely out. Operate the extinguisher from a safe distance, several feet away, and then move towards the fire once it starts to diminish. Remember: Aim at the base of the fire, not at the flames!!

Teaching

- Do you teach your children how to use fire as a tool...not a toy?
- Do your children keep a safe distance from flame and heat sources?
- Do you teach your children about vapors and do they understand how vapors work?
- Do you teach your children how to cook and use kitchen appliances correctly?
- Do you teach your children to read directions and warning labels?

General Safety

- Do you have an Emergency Preparedness Plan?
- Do you extinguish candles when you leave the area?
- Do you use non-combustible containers to set candles on?
- Do you teach your children that candles are tools for adults and not toys?
- Do you have a rule in your home that no candles are allowed in children's bedrooms?
- Do you make it a good practice to never run the dishwasher, clothes dryer, or washing machine when you are not home?
- Do icicles from above or on your gas meter in the winter months?
- Do you read the manufacture instructions on the items you purchase for your home?
- Do your children know their addresses?

You can request a Fire Safety Home Inspection from the Excelsior Fire District.

You should also consider hiring a certified electrician, a certified home inspector, and ask you local natural gas supplier or appliance store to come to you home and inspect all you appliances with a pilot light an make sure they are in good repair and not emitting carbon monoxide.

Check out the safety articles on this web site for more information on the items listed above.
